"Natural wine" covers some combination of organic (o) and biodynamic (b) farming, plus the use of yeasts (for fermentation) native to their soil. We select only wines "spontaneous fermented", which simply use yeasts residing naturally on the grapes. Many of these wines are not filtered (nf) and all have minimal sulphur. As a general proposition, natural wines are less manipulated so as to let the grapes and their environs express themselves, sometimes in random fashion. All of our wines are vegan. This list is curated by Mark Bires, not a sommelier but a noted wino and sometimes chef. Glasses are 6 ounce pours.
